Professional English Communication course

Course Structure

The Curriculum has been designed with focus on the four main aspects of teaching and learning the English language, with each aspect given due importance proportionately in every session of three and a half hours.

Grammar & Writing, Reading, Listening, Speaking.

The lesson plans for all classes are prepared for the architects' 'progressive improvement along the duration of the course, culminating in the knowledge evaluation and results certified by SLIA.

Learning Outcomes

Communicate effectively, thoughts, ideas, information, and messages involved in Architectural discourse both in oral and written forms of English.

Develop grammatical and language structures required for professional communication.

Enhance reading and listening skills required towards effective comprehension and expression of ideas in the field of Architecture.

Acquire English language knowledge in order to follow social customs and attitudes of the global world of work.
